I. MINIMUM WAGE RATES

This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100.

2. The minimum wage is the lowest rate payable for a particular occupation, and for most occupations it comprises the basic wage (see page 11) and "secondary" wage payments, i.e. additional amounts such as margins for skill, etc., and loadings of various kinds. In the majority of cases such rates are prescribed in awards or determinations of Commonwealth or State industrial authorities or in agreements registered with them.

3. The Minimum Wage Rate Index is based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November, 1954. This second survey showed the number of employees in each occupation within selected awards, etc., in the various industries, thereby providing occupation weights.

4. The minimum wage rates used in the index are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each period commencing with 31st March, 1939, for adult males and 31st March, 1951, for adult females. The index for adult males includes rates for 3,417 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,315. For adult females the corresponding numbers are 1,103 and 518. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industrial group for each State and Australia. Because of coverage difficulties the rural industry is not included in the index.

5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary-earners are excluded.

6. In ascertaining from awards, etc., the wage rates for representative occupations, it was found in some cases that an occupation selected as representative in the base year (1954) did not exist in earlier years. In such cases another occupation with the same marginal rate of wage was chosen from the same award and variations in the wage rates for this occupation were taken to be representative for the earlier period.

7. Since 1954 the industrial structure in Australia, and particularly in some States, has been undergoing a degree of change which over a period is likely to have some effects on the index. Generally the effect of new or expanding industries on the index is not significant, because occupations in such industries can usually be covered by existing awards, and the wage rates for the new occupations conform very closely to those for existing occupations. Occasionally, however, an entirely new award is made to cover a new industry, and in such cases occupations from the new award are introduced into the index whenever such action is warranted by the number of employees in the industry. By these means it has been possible for the occupations in the index to be kept, as nearly as may be, continuously representative and for a high degree of comparability to be preserved over a long period.

8. Weighted averages of the components of the total minimum weekly wage rate, i.e. basic wage, margin and loading, are calculated separately for adult male employees covered by Commonwealth awards, etc., and for those covered by State awards, etc. Relevant definitions are as follows: -

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

"Basic wage" rates are weighted averages of the weekly rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases the basic wage rate actually paid is used in tables herein. For these and other reasons, the weighted average basic wage rates shown in the tables in this section differ, in the majority of cases, from the metropolitan basic wage rates shown in Section II.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.

9. The proportion of employees covered by Commonwealth and State awards, etc., varies considerably as between States. In addition, the proportions of employees engaged in the respective industries differ from State to State. As a result there are relatively wide differences between the weighted average amounts of margins and loadings in the several States.

10. The wage rates shown in the tables in this section should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends. Neither the wage rates nor the corresponding index numbers measure the relative level of minimum wages as between States.

11. Minimum weekly wage rates for adult males should not be compared with average weekly earnings per employed male unit, shown in Section III, because the latter include not only the earnings of adult wage-earners but also those of all salaried employees, junior wage-earners and part-time and casual employees.

12. Wage rates and index numbers for adult males are available as at the end of each quarter from 31st March, 1939 to 31st December, 1956 and as at the end of each month from 31st January, 1957. Particulars for adult females are compiled quarterly and are available from 31st March, 1951. Weekly rates and index numbers have been published in full detail in the following Statistical Bulletins: -

S.B. 123 - Minimum Weekly Wage Rates, 1939 to 1959.

S.B. 124 - Minimum Weekly Wage Rates, January, 1960 to June, 1962.

(a) See paragraph 10, page 4; excludes rural; mining and quarrying; and building and construction.

II. BASIC WAGE RATES

Basic wage rates are determined by Commonwealth or State industrial authorities. The basic wage is that part of the minimum wage to which are added any margins for skill, loadings, etc. It is determined without regard to any circumstance pertaining to the occupation or industry of an employee.

1. Commonwealth Basic Wages

The Commonwealth Conciliation and Arbitration Commission may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award altering the basic wage or the principles upon which it is computed. In practice, the Commission holds general basic wage inquiries from time to time and its findings apply to industrial awards within its jurisdiction. After the 1961 Basic Wage Inquiry the Commission decided that Commonwealth basic wages should in future be adjusted annually in accordance with movements in the Consumer Price Index for the six capital cities (weighted average), unless the Commission was persuaded to the contrary by those opposing the change, and that a review of the economy generally and in particular of productivity increases would take place every three or four years.

2. State Basic Wages

In New South Wales the basic wage is automatically adjusted each quarter in accordance with variations in the Consumer Price Index. State basic wages are not declared in Victoria and Tasmania, but Wages Boards, which determine minimum rates to be paid in various industry groups or callings, now generally adopt Commonwealth rates. In Queensland the industrial authority may declare a basic wage only after a full inquiry. In South Australia the rates have been the same as Commonwealth rates since 1950. The industrial authority in Western Australia determines the basic wage each quarter after considering retail price index numbers.

For further information reference should be made to the Labour Report, in which the history of basic wage fixation in Australia is dealt with at some length. For tables showing Commonwealth and State basic wage rates for a long period of years see the Appendix to Labour Report No. 48, 1960.

(a) See explanatory notes on previous page. (b) Automatic quarterly adjustments operative. (c) Automatic adjustments were discontinued on 17th October, 1956. (d) To March, 1961, the State industrial tribunal determined the basic wage each quarter after considering retail price index numbers. Rates now declared only after a full inquiry. (e) Payable from first pay-period in May, 1963. (f) During July and August, 1961, Wages Boards adopted Commonwealth rates. (g) Payable from 6th May, 1963. (h) Operative since 10th July, 1961. (i) Payable from 22nd April, 1963. (j) Most Wages Boards adopted Commonwealth rates from July, 1961.

III. TOTAL WAGES AND SALARIES PAID AND AVERAGE EARNINGS

The figures in this section are derived from employment and wages and salaries recorded on Pay-roll Tax returns, from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included.

The figures in Table 11 are weekly averages of the total wages and salaries paid to all civilian employees during the periods shown. These totals have been converted to average weekly earnings in Table 12. The figures in the tables are not seasonally adjusted. Seasonally adjusted quarterly indexes of average earnings are shown in Table 13.

Particulars of wages and salaries paid are not available for males and females separately; average weekly earnings have therefore been calculated by dividing total wages and salaries, etc., by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States the same ratio has been used in each State. Because the actual ratio may vary between States precise comparisons between average earnings in different States cannot be made on the basis of the figures in Table 12.

For a number of reasons the average weekly earnings per employed male unit, shown in Table 12, cannot be compared with the minimum weekly wage rates shown in Tables 1-4. The figures in Tables 1-4 are weighted average minimum (award) rates payable to adult male wage earners in non-rural industry for a full week's work, at the end of each month or year. Those in Table 12 represent actual average weekly earnings for all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) and are quarterly or annual averages.

The figures in this section are subject to revision.

TABLE 11 - AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID (a)
(£'000)

Period	N.S.W. (b)	Vic.	Qld.	S.A. (c)	W.A.	Tas.	Australia

1963 - March	23.87	23.93	21.05	21.88	21.04	21.85	23.09

(a) Includes, in addition to wages at award rates, earnings of salaried employees, over-time earnings, over-award and bonus payments, etc. See explanatory notes on previous page. (b) Includes the Australian Capital Territory. (c) Includes the Northern Territory.

NOTE: - Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

TABLE 13 - INDEXES OF AVERAGE WEEKLY EARNINGS (a) : AUSTRALIA

(Base of each Index : Year 1953-54 = 100)

Seasonally Adjusted

Year	All Industries (b)	Manufacturing (c)	Quarter	All Industries (b)	Manufacturing (c)
1952-53	95.2	95.4	1960 - December	141.3	141.7
1953-54	100.0	100.0	1961 - March	141.3	142.4
1954-55	105.4	106.9	June	141.1	140.2
1955-56	112.2	113.8	September	141.8	140.9
1956-57	118.2	118.3	December	144.7	142.8
1957-58	121.3	122.0	1962 - March	145.4	144.4
1958-59	124.5	125.6	June	147.0	145.4
1959-60	133.6	135.4	September	146.2	145.7
1960-61	140.5	141.1	December	147.3	145.6
1961-62	144.7	143.4	1963 - March	149.6	148.6

(a) See explanatory notes on previous page. (b) Average earnings per employed male unit. Based on Pay-roll Tax returns and other data. (c) The index for manufacturing industries for the years 1952-53 to 1961-62 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual Factory Censuses. The figures for periods subsequent to June, 1962, are interim estimates based on Pay-roll Tax returns and are subject to revision when the Factory Census for 1962-63 is tabulated.

NOTE: - The index numbers for "All Industries" and "Manufacturing" show the movement in average earnings for each group over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups.

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS
CANBERRA, A.C.T. 16TH JULY, 1963

K.M. ARCHER
COMMONWEALTH STATISTICIAN

NOTE: - Inquiries concerning these statistics may be made in Canberra by telephoning J1971, Extension 10, or, in each State capital, by telephoning the office of the Bureau of Census and Statistics.
